Separate paging is given to this Part in order that it may be filed as a separate compilation

## PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to  
Patents and Designs

## THE PATENT OFFICE

## Patents and Designs

Calcutta, the 24th January 1959

## Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

8th January 1959

66359. B. P. Patil. Method of manufacturing utensils in one-piece by semidie casting.
66360. B. P. Patil. Method of casting of utensils in one-piece without joints.
66361. Imperial Chemical Industries Limited. Polyisocyanate compositions. (1st November 1957). [Addition to No. 63433]. [Divisional date 17th March 1958].
66362. Universal Oil Products Company. Process for the alkylation of aromatic hydrocarbons.
66363. R. Hagen. Process and apparatus for manufacturing bottles and the like from thermoplastic materials.
66364. H. E. Helman. Improvements in or relating to medicaments. (9th January 1958).
66365. S. B. Penick and Company. Alkaloid manufacture.
66366. D. P. Asar. Pouch.
66367. Veb Dampferzeuger. Device for the control and adjustment of the liquid level, especially in storage drum of steam generating plants.
- 9th January 1959
66368. D. D. Mehra. An improved process for the manufacture of gelatine and glue.
66369. C. R. Gupta. Novel arrangements and mechanisms for causing to work the brakes and cutting of driving power for railway trains.
66370. Ram Kanta Bhattacharya. Plastic coating composition for fabric roof walls floors and the like.
66371. Dr. Beck & Co., G.m.b.H. Improvement in or relating to the polymerisation of polyesters.
66372. Spofa, Sdruzeni podniku pro zdravotnickou výrobu. Tetracycline drugs and method of preparing same.
66373. Spofa, Sdruzeni podniku pro zdravotnickou výrobu. A method of preparing new 1, 3-disubstituted phenothiazine derivatives.
66374. Woodall-Duckham Construction Company Limited. Improvements in or relating to the operation of coal carbonizing installations. (9th January 1958).
- 10th January 1959
66375. D. K. Dhand. An improved water cooler.
66376. Kosmek Plastics Manufacturing Private Limited. Improvements in or relating to wall plugs and to sheet materials for preparing the same.

66377. Societe Anonyme Des Manufactures Des Glaces Et Produits Chimiques De Saint-Gobain, Chauny & Cirey. A process for the manufacture of anhydrous hydrofluoric acid from its aqueous solutions.

66378. Hewitt-Robins Incorporated. Improvements in apparatus for reclaiming material from storage piles.

66379. E. Kusters. Roller for the pressure treatment of an industrial material.

66380. The British Oxygen Company Limited. Electric arc welding apparatus. (13th January 1958).

66381. British Nylon Spinners Limited. Warp beams and means for packing thereof. (16th January 1958).

66382. The Distillers Company Limited. Foods containing arabitol. (4th February 1958).

12th January 1959

66383. M/s. Karamchand Premchand Ltd. The process of preparation of isonicotinic acid by the oxidation of gammapicoline (after condensing with formaldehyde or paraformaldehyde) with nitric acid or sodium nitrate—sulphuric acid mixture.

66384. D. K. Dhand. An improved water cooler.

66385. Koppers Company, Inc. Resorcinol diglycidyl ether or epoxy alkoxy phenol aldehyde resin solid polyamine compositions.

66386. Koppers Company, Inc. Method of producing resins of controlled properties.

66387. Koppers Company, Inc. Process of preparing epoxy resins.

66388. Koppers Company, Inc. Adhesive compositions.

66389. Koppers Company, Inc. Process for the manufacture of glycidyl ether of polyhydric phenols.

66390. Imperial Chemical Industries Limited. Improvements in or relating to the manufacture of cellular polymeric materials. (22nd January 1958).

66391. Dunlop Rubber Company Limited. Improvements in or relating to the manufacture of pneumatic tyres. (29th January 1958).

66392. Beecham Research Laboratories Limited. Acetylenic compounds. (20th January 1958).

66393. Mannesmann-Moer Aktiengesellschaft. Improvements relating to rolling mills.

66394. Preformed Line Products Company. Cable reinforcement.

66395. Union Carbide Corporation. Insecticidal compositions containing 1-naphthyl-N-Methylcarbamate and synergists therefor.

66396. J.R. Solankee. Guiding and stretching device for fabrics.

66397. Vyzkumny a zkusebni letecky ustav. Electrical engine starter.

66398. Ejectoret S.A. and Etablissement Pako. Lipstick case.

66399. Albert Adam Stonehill. Surgical package.

13th January 1959

66400. Farbenfabriken Bayer Aktiengesellschaft. Tetra-Azaporphine dyestuffs. (1st December 1958).
66401. Pritchett & Gold and F.P.S. Company Limited. Improvements relating to separators for electric accumulators. (23rd January 1958).
66402. The Wellcome Foundation Limited. Improvements in and relating to the preparation of benzo (a) quinoxalines. (22nd January 1958).
66403. Metropolitan-Vickers Electrical Company Limited. Improvements relating to sequence control apparatus. (14th January 1958).
66404. N. V. Philips' Gloeilampenfabrieken. Improvements in and relating to semi-conductor devices. (16th January 1958).
66405. Kyowa Hakko Kogyo Kaishiki Kaisha. A method of producing L-lysine by fermentation.
66406. Griffin Wheel Company. Preparation of pouring tubes.
66407. F. Thelemann and B. Hausmann. Multilayer ventilation pipe and method and apparatus for making the same.
66408. Inventio Aktiengesellschaft. Apparatus for moving a control member between an inoperative position and an effective position.
66409. Aluminium-Industrie-Aktien-Gesellschaft. Improvements relating to self-baking anodes used in the production of aluminium.
66410. Sandoz Ltd. Improvements in or relating to organic compounds. (20th October 1958).
66411. Taskers of Andover, (1932), Limited. Improvements in and relating to coupling arrangements for tractor vehicles and trailers. (6th February 1958).
66412. Ciba Limited. Process for the production of sassafras polysaccharides.
66413. Ciba Limited. Manufacture of an ester.
66414. G. R. Thakre. Improvements regarding safety match sticks.

14th January 1959

66415. C. A. Birchall. Mirror wiper. (22nd January 1958).
66416. Societe Des Usines Chimiques Rhone-Poulenc. New steroid derivatives.
66417. C. I. Williams. Anchoring means for a concrete form construction. [Divisional date 17th August 1957].
66418. Gresham & Craven Limited and Girling Limited. Improvements relating to vacuum brake cylinders for railway vacuum braking systems. (20th January 1958).
66419. Commissariat A L'Energie Atomique. Improvements in or relating to fuel elements in nuclear reactors. (15th January 1958).
66420. Commissariat A L'Energie Atomique. Reinforced lead elements for ballasting and protection against ionizing radiations. (21st January 1958).
66421. Phirx-Werke Aktiengesellschaft. Pumping devices for filament forming solutions in spinning machines and means for supporting same.
66422. Metallgesellschaft A.G. Improvement in or relating to grate bars for travelling grates, sinter bands and the like.
66423. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to circuit arrangements for giving a signal when the current strength of a pulse produced in a conductor has a value which does not lie within a certain interval.
66424. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to circuit arrangements to produce a sawtooth current in a coil and a direct voltage.
66425. Ciba Limited. Manufacture of nitrogen heterocycles.
66426. B. Romanin. A new textile structure and the process for its manufacture.

#### Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to

the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933 of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

60240. S. S. Engineer. A thermoplastic ink bottle or the like having integral filler means. Accepted on 18th October 1958.

*A hollow blown bottle provided with an integrally formed nipple or like.*

60287. Sindri Fertilizers & Chemicals Private Ltd. A process of preparation of active carbon from Indian lignite and molasses. Accepted on 13th January 1959.

*Blending lignite with molasses, drying and carbonising activating carbonised mass at elevated temperature and quenching washing and drying the product.*

60729. M. H. Detrick Company. Roof constructions for furnaces. Accepted on 9th January 1959.

*Comprising a lower heat exposed face of insulating fire brick, a hanger of hard fire brick for holding the same and means for supporting said hangers in position upon a framework.*

61053. C. I. Williams. Concrete form construction. Accepted on 9th January 1959.

*Form set with tie rods at an acute angle and with corresponding she-bolts for supporting the forms and attached to tie rods, also set at an acute angle.*

61072. D. Napier & Son Limited. Electrical de-icing or anti-icing apparatus. (16th July 1956). [Addition to No. 55371]. Accepted on 12th January 1959.

*Metallic layer constituting resistance heating element sprayed on base insulating surface, an outer layer of insulating material applied over this metallic layer and an outermost metallic layer applied over the said outer insulating layer.*

61078. Torrance & Sons Limited. Method of dispersing solid particles in liquid and products thereof. (13th July 1956). Accepted on 8th January 1959.

*Agitating the liquid containing solid particles in container with steatite beads.*

61079. Torrance & Sons Limited. Method of and apparatus for forming dispersions of solid particles in liquids. (13th July 1956). Accepted on 8th January 1959.

*Agitating mixture in container and automatically operated valves causing additions of liquid and solids and withdrawal of dispersion intermittently in like quantities.*

61103. Daimler-Benz Aktiengesellschaft. Improvements relating to axle-suspensions for motor vehicles. (10th May 1957). Accepted on 9th January 1959.

*Rigid axle sprung by non-guiding springs against superstructure and is articulated to it by guide links.*

61112. Organico. Process and apparatus for the production and treatment of polymers. Accepted on 12th January 1959.

*The mass is passed through a treatment apparatus which is protected from contact with the air.*

61116. C. I. Williams. A clamping device for use with a concrete form construction. Accepted on 8th January 1959.

*An elongated tubular adjusting nut operatively mounted on the outer end of the form tie rod and a clamping bracket complementally formed to detachably receive the former.*

61129. United States Steel Corporation. Gauge-control system for multi-stand strip mill. Accepted on 12th January 1959.

*Means for continuously measuring thickness of strip as it emerges from last stand, measuring means effective to control speed of at least one drive motors.*

61355. The British Thomson-Houston Company Limited. Improvements in and relating to electrical conveyances and other conveyances moving in predetermined paths. (13th August 1956). Accepted on 10th January 1959.

*Includes magnetic element extending along path of conveyance and signal-responsive means co-operating with magnetic element and movable relatively to the element, magnetic element impressed with signals to which signal-responsive means adapted to respond to control the conveyance.*

61356. The British Thomson-Houston Company Limited. Improvements in and relating to electrical control systems for conveyances of the kind which are hauled in a predetermined path by a cable or the like. (13th August 1956). Accepted on 10th January 1959.

*Including flexible element having driving means coupled with conveyance to be moved with it and stationary signal responsive means co-operating with flexible element on which is impressed signals to which signal responsive means respond to control the conveyance.*

61375. E. I. du Pont de Nemours and Company. Novel hexafluoropropylene/tetrafluoroethylene inter-polymers and process for their preparation. Accepted on 8th January 1959.

*By interpolymerizing hexafluoro-propylene and tetra fluoroethylene to obtain an intermediate resinous product which is then heated in the molten state to obtain the final product.*

61393. O. Hilger and H. Friedrichs and Indugas Gesellschaft. fur industrielle G.sverwendung m.b.H. Improvements relating to the decarburisation of cast iron. (20th June 1957). Accepted on 13th January 1959.

*Annealing or decarburising unannealed or malleable cast iron in an indirectly heated furnace chamber containing a circulating gas atmosphere of decarburising action of coal gas or Mond gas.*

61534. Metropolitan-Vickers Electrical Company Limited. Improvements relating to magnetic amplifier switching circuits. (24th August 1956). Accepted on 9th January 1959.

*Comprising a magnetic amplifier having saturable magnetic core, on output winding connected with half-wave rectifier for energisation from a source of alternating load voltage of a resetting control winding also connected with a half-wave rectifier and energisable from a source of alternate control voltage to produce a control flux to reverse magnetisation of core, together with switch opposing in one setting and permitting in another setting production of flux by control winding.*

61567. E. I. du Pont de Nemours and Company. Fluid jet twist crimping process. 13th January 1959.

*Applying a fluid stream having at least 1/2 sonic velocity and preferably sonic or higher velocity to the axis of the yarn which is kept under low tension.*

61787. Laporte Chemicals Limited. Improvements in or relating to the purification of hydrogen peroxide. Accepted on 9th January 1959.

*By contacting with a resinous material having anion and cation exchange components, the ratio of anion exchange sites to cation exchange sites being not greater than 1.5:1.*

61888. S. R. Sathe. Improved hand spinning wheel, i.e. charkha. Accepted on 13th January 1959.

*Double grooved guide and tension pulley supported on a sliding plate which in turn is tensioned by a suspended weight.*

62277. Novo Therapeutisk Laboratorium A/S. Process of producing insulin crystal suspensions having a protracted effect. Accepted on 13th January 1959.

*The crystals are suspended in an aqueous medium and a metal content (less than 6 metal atoms per unit cell of crystals) which promotes crystallisation of insulin is furnished.*

62349. Alembic Chemical Works Company Limited. Process for the preparation of a pure bronchodilator designated "vasicinone". Accepted on 8th January 1959.

*Bronchodilator is isolated by per se conventional methods from an extract obtainable from leaves of plant Adhatoda Vasica Nees.*

62380. Esso Research and Engineering Company. Process for the treatment of whole cudes. Accepted on 13th January 1959.

*Heated crude feed is flaked in the presence of hydrogen, and the vapours are hydrofined and fractionated at the same superatmospheric pressure.*

62461. Farbenfabriken Bayer Aktiengesellschaft. Dyeing and printing of textiles. Accepted on 9th January 1959.

*Comprising using emulsion of water insoluble to slightly soluble polymeric film former together with polycondensation products containing methylol group.*

62812. N. V. De Bataafsche Petroleum Maatschappij. Apparatus for the separation of fine solid particles from a gas stream entraining these particles. Accepted on 14th January 1959.

*A discharge for solid particles is present which is situated at the bottom of the belt shaped catching hood and concentrically around the riser.*

62959. Montecatini Societa Generale Per L'Industria Mineraria E Chimica, and G. de Varda. Quick starting of closed multi-cell furnace for electrolytic aluminium production. (27th January 1958). Accepted on 8th January 1959.

*Multi-cell furnace for the electrolytic production of aluminium.*

63032. Joseph Bancroft and Sons Company. Method and apparatus for handling and processing crimped textile fibres. Accepted on 10th January 1959.

*Imparting artificial crimp to fibres and means for wrapping the crimped fibres into packages.*

63167. General Electric Company. Manufacture of sealing rings for gas turbine engines. Accepted on 8th January 1959.

*A backing ring is lined with a lining metal.*

63180. BYK-Gulden Lomberg Chemische Fabrik G.m.b.H. Process for the production of a tanning homogeneous crystalline water-soluble condensation product having valuable therapeutic properties. Accepted on 13th January 1959.

*M-Cresol is sulphonated, treated with formaldehyde solution and the product is precipitated with HCl.*

63337. E. K. Cole Limited. Improvements in or relating to television receivers. (13th March 1957). Accepted on 14th January 1959.

*Of the type in which an efficiency diode is employed to supply boost volts in the line time base output stage and in which A.G.C. voltage is obtained with the aid of gating pulses derived from the line time base.*

63477. Bancroft-Brillotex International S.A. Process for cleaning dirty wool and other fibres. Accepted on 10 January 1959.

*Rubbing together the fibres to be cleaned with palpable particles of cereal grain until said particles adsorb and absorb undesired from the said fibres and then forcing the palpable material from the fibres.*

63607. Dr. E. Gretener. Method for processing a subtractive motion picture film. [Addition to No. 55486]. Accepted on 13th January 1959.

From master obtained by photographing coloured object, there is obtained by photographic steps a picture registration and the registration corrected by values superimposed in photographic process and which are obtained by scanning of master and conversion resulting colour component signals, either correcting value or photographically obtained combination being employed as photographic recording on intermediate film and the other component being constituted as optical image during printing.

63609. Consortium Fur Elektrochemische Industrie G.M.b.H. Process for the manufacture of carbonyl compounds. (1st January 1958). Accepted on 12th January 1959.

An olefine with oxygen is conducted over a catalyst comprising a compound of a transitional metal of groups 5—8 and sub-group 1, in the presence of steam.

63689. Westinghouse Brake & Signal Company Limited. Improvements relating to centralised traffic control systems. (18th April 1957). Accepted on 8th January 1959.

For remote control from a control office of points, signals and other apparatus governing the movement of traffic at one or more remotely situated field locations.

63782. W. R. Ames Company. Gate valve. Accepted on 10th January 1959.

Comprising in combination, inner and outer frame members for engagement with the opposite sides of the pipe wall around the opening and providing continuous support therefor.

63853. Aktiebolaget Svenska Flaktfabriken. A device for inducing and mixing by ejecting action secondary air into a current of primary air. Accepted on 13th January 1959.

Having nozzle means with many narrow slots mutually paralalled and close and constituting throats of corresponding number of flow passages with same cross-section area as the slots the flow passages being given such a hydraulic diameter with respect to used medium velocity that Reynold's number does not exceed 2000.

63877. M-R-S Manufacturing Company. Earth moving machine. Accepted on 10th January 1959.

Carrying means being pivotally mounted on said frame means for tipping toward the open side for dumping earth.

63890. Siemens & Halske Aktiengesellschaft. Circuit arrangement for teleprinter storage exchanges. (18th July 1957). Accepted on 8th January 1959.

Transmitting means associated with serial number transmitter allocated to required subscriber's station and which are adapted to select one subscriber's station out of a plurality of such stations connected to omnibus line and which produce a teleprinter pulse combination.

63894. D. P. Asar. Venetian blinds. [Addition to No. 62437]. Accepted on 13th January 1959.

Slat end clip comprises a three pronged piece with central prong at slightly different plane than the end prongs so as to form a jaw and on each of these prongs is formed an engagement lug or pin, the pins on the end prongs and central prong facing each other.

63901. Cable Covers Limited. Improvements in or relating to clips. Accepted on 8th January 1959.

For attachment to rod-like members such as conductors comprising a housing adopted to seat at its base and a gripping member movable within the housing.

64080. E. I. du Pont de Nemours and Company. Staple fiber yarn. Accepted on 10th January 1959.

The staple fiber yarn comprises a blend of natural and synthetic fibers in which the synthetic fiber is a high strength linear condensation polymer having a load-bearing capacity equal to greater than that of the natural fiber at the break elongation of the natural fiber.

64456. Franz Muller Maschinenfabrik K.G. Improvements in or relating to textile winding machines. Accepted on 10th January 1959.

Each split drum is constructed of two drum parts which are internally unconnected and separated from one another by a gap.

64478. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to semi-conductor devices. Accepted on 13th January 1959.

Semi-conductive electrode system having an electronic switch, a diode having a variable threshold voltage, and a negative alternating current resistor.

65387. D. Levin. Improvements in cooking pots. (9th October 1957). Accepted on 8th January 1959.

Having a bottom cover comprising a composite disc made up of sheet insulating material encased between the sheets of metal.

#### Opposition Proceedings

An opposition has been entered by Steelage Industries Private Limited to the grant of a patent on application No. 60248 made by Godrej & Boyce Manufacturing Company, Private Limited.

#### Printed Specification Published

A limited number of printed copies of the undernoted specifications are available for sale from Officer-in-Charge, Government of India, Central Depot, 8, Hastings Street, Calcutta, at two rupees per copy:—

##### (1)

55443. 55471. 55498. 55821. 56120. 56143. 56172. 56243. 56268. 56427. 56445. 56455. 56456. 56458. 56492. 56498. 56571. 56628. 56633. 56651. 56716. 56740. 56828. 56845. 56932. 56938. 56994. 57023. 57074. 57133. 57145. 57185. 57526. 57598. 57688. 57689. 57692. 57741. 57818. 57837. 57876. 58014. 58033. 58265. 58282. 58399. 58417. 58438. 58454. 58493. 58668. 58738. 58786. 58800. 58954. 59097. 59122. 59366. 59429. 59724. 59873. 60005. 60139. 60451.
